Projects

Sai Land Developers : [visit site](#)

Sai Land Developer provides a fully responsive and user-friendly ERP solution that goes beyond a website, offering complete role-based management for accounts, workshops, finance, and all departments in one powerful, integrated system.

VR Academy hub : [visit site](#)

VR Academy Hub is a web-based platform that manages enrollments, online batches, enquiries, and secure payments, featuring role-based access and smart dashboards for quick analysis – all integrated with a dynamic website.

Shree Sai Multiservices : [visit site](#)

Shree Sai Multiservices is a user-friendly e-commerce website designed for purchasing a wide range of housekeeping materials online, offering a smooth shopping experience with secure transactions and easy order management.

To date, I have successfully developed 15+ customized software solutions tailored to diverse industries and business models, addressing various operational needs, workflows, and complex use cases to enhance efficiency, automation, and overall business performance.
