PROJECTS

Institute Management System (Own Product) www.ims.com

Institute Management System is designed to cater to the needs of various roles within the institution. The Institute role can manage and oversee all aspects of the institution, including student admissions, fee collection, attendance monitoring, and result generation. The Staff role can manage daily administrative tasks, such as taking attendance and updating student records. The Student role can access their academic records, attendance, and exam results, as well as receive important notifications from the institute. [Click Here](#)

Web Application (Freelancing) www.bhavanapublicschool.com

This is a web application that has been developed using the Django framework. The website runs smoothly, and it is optimized for quick loading times, which makes it highly ranked on Google. Additionally, this website is designed to be compatible with all devices, ensuring maximum user comfort and convenience. [Click Here](#)

Web Application (Freelancing) www.moneytrust.com

This is the web application. The project involves iterative design and animations. Through this project, users can apply for various types of loans. The responsive design ensures that the application is comfortable to use on all devices. [Click Here](#)

Web Application (Freelancing) www.dataarch.co

This is a single-page application or responsive website that has been developed for a small IT services office. The website is currently hosted on a server [Click Here](#)

E-Commerce Website (Freelancing) www.saigangaenterprises.com

I have designed and developed a major live project - a responsive website for Captain Mini Tractor Showroom. This website enables users to make inquiries, shop, and view information about the organization's products and showroom. Authenticated users can create various types of bills, including invoices, quotations, and margin money receipts. Please visit saigangaenterprises.com to explore the website. [Click Here](#)

E-Commerce Dynamic Website (Freelancing) www.tambetransport.com

I designed and developed a website for a transport system, which offers efficient and seamless transportation services. The website features a responsive design, allowing for optimal viewing on all devices. It includes advanced functionalities such as image uploading and downloading, automatic bill generation, precise calculation, secure login authentication, a variety of filters (including date range), For more information, kindly visit tambetransport.com.
